SUBJECT INDEX TO VOLUME 76, 1997

Explanation of Symbols:
The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.
Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which that name appears.

A FIBERS (see Nerve Fibers)

AADR (see IADR/AADR)

ABRASION RESISTANCE
In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405
New optical 3-D device for the detection of wear, A. Mehl, A., *et al.*, 1799
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

ABRASION (see Tooth Abrasion)

ABSTRACTS
Abstracts, IADR/AADR, 14–452
Divisional abstracts, 916–1228

ACCESSORY CELLS, IMMUNOLOGIC (see Antigen-Presenting Cells)

ACETYL-CoA ACETYLTRANSFERASE
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

ACETYLCHOLINE
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

ACID ETCHING, DENTAL
N-phenyliminodiacetic acid as an etchant/primer for dentin bonding. Schumacher, G.E., *et al.*, 602

ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

ACTIVIN A
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625

ACTIVIN RECEPTOR-LIKE KINASES
Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555

ADHESION, BACTERIAL (see Bacterial Adhesion)

ADOLESCENCE
Changes in self-reported dental anxiety in New Zealand adolescents from ages 15 to 18 years. Thomson, W.M., *et al.*, 1287
Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

AGED
Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271
Three-year changes in self-perceived oral health status in an older Canadian population. Locker, D. and Jokovic, A., 1292

AGING
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367

ALKALINE PHOSPHATASE
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

ALLOYS, DENTAL (see Dental Alloys)

ALTERNATIVE SPLICING
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641

ALVEOLAR BONE
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

ALVEOLAR BONE LOSS
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study. Lindquist, L.W., *et al.*, 1667
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538

AMELOBLASTS
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720

AMELOGENESIS
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648

AMINE FLUORIDE (see Fluorides)

AMINO ACIDS
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

AMYLASES
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

ANALGESIA
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848

ANKYLOSIS
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

ANTI-INFLAMMATORY AGENTS
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381

ANTIBIOTICS
Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

ANTIGEN-PRESENTING CELLS
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

ANTIGENS
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538

ANTIGENS, CD14
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

ANTIGENS, CD44
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

ANTIMICROBIALS (see Antibiotics)

ANXIETY (see Dental Anxiety)

APATITES
Setting reaction and hardening of an apatitic calcium phosphate cement. Ginebra, M.P., *et al.*, 905

ARGON
Effect of pressure difference on the quality of titanium casting. Watanabe, I., *et al.*, 773

ARTIFICIAL INTELLIGENCE
Computer intuition: guiding scientific research in imaging and oral implantology. Almog, D.M. and Heisler, E.M., 1684

ASH, MAJOR M., JR.
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

ATHEROSCLEROSIS
Salivary cholesterol of healthy adults in relation to serum cholesterol concentration and oral health. Karjalainen, S., *et al.*, 1637

AUTHORSHIP
Guest editorial: is it time for a new approach to authorship? Leash, E., 724

AUTONOMIC NERVOUS SYSTEM
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

B LYMPHOCYTES
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548

BACTERIA
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

BACTERIAL ADHESION
Inhibition of *Streptococcus mutans* adsorption to hydroxyapatites by low-molecular-weight chitosans. Tarsi, R., *et al.*, 665
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770
Porphyromonas gingivalis fimbriae mediate coaggregation with *Streptococcus oralis* through specific domains. Amano, A., *et al.*, 852

BACTEROIDES FORSYTHUS
Identification of *Bacteroides forsythus* in subgingival dental plaque with the aid of rapid PCR method. Meurman, J.H., *et al.*, 1376

BIBBY, BASIL
Dr. Basil Bibby: early fluoride investigator and intellectual provocateur. Handelman, S. and Zero, D.T., 1621

BIOCOMPATIBLE MATERIALS
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682

BIOGLYCAN
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

BIOLOGICAL MARKERS
Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

BIOMECHANICS
Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316
Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704
Movements of the mandibular condyle kinematic center during jaw opening and closing. Yatabe, M., *et al.*, 714
Three-dimensional finite element model of prismatic enamel: a re-appraisal of the data on the Young's modulus of enamel, A. Spears, I.R., 1690

BISPHOSPHONATE
(see Diphosphonates)

BITE FORCE
Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839

BITE REGISTRATION
(see Jaw Relation Record)

BLOOD SEDIMENTATION RATE
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271

BLOTTING, NORTHERN
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Expression of TGF-β superfamily receptors

in dental pulp. Toyono, T. *et al.*, 1555

BLOTTING, WESTERN
Activation and novel processing of matrix metalloproteinases by a thiolproteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

BODY HEIGHT
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579

BONDING, DENTAL
(see Dental Bonding)

BONDING AGENTS, DENTIN
(see Dentin-Bonding Agents)

BONE AND BONES
Amorphous calcium phosphate: the contention of bone. Boskey, A.L., 1433

BONE DEVELOPMENT
Effects of ionizing radiation on proliferation and differentiation of osteoblast-like cells. Dare, A., *et al.*, 658

BONE FORMATION
(see Osteogenesis)

BONE LOSS, PERIODONTAL
(see Alveolar Bone Loss)

BONE MINERALIZATION
(see Calcification, Physiologic)

BONE MORPHOGENETIC PROTEINS
Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

BONE REMODELING
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

BONE TRANSPLANTATION
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682

BOOK REVIEWS
Metabolism and Toxicity of Fluoride, The, 814

BROMOCRIPTINE
Effects of the D2 receptor agonist bromocriptine on sleep bruxism: report of two single-patient clinical trials. Lobbezoo, F., *et al.*, 1610

BRUXISM
Effects of the D2 receptor agonist bromocriptine on sleep bruxism: report of two single-patient clinical trials. Lobbezoo, F., *et al.*, 1610

BUNTING, RUSSELL
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

BUTYRIC ACIDS
Short-chain carboxylic acid concentration in human gingival crevicular fluid. Niederman, R., *et al.*, 575

C FIBERS (see Nerve Fibers)

C-REACTIVE PROTEIN
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271

CADAVERINE
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

CALCIFICATION, PHYSIOLOGIC
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
High resolution electron microscopy: structure and growth mechanisms of human dentin crystals. Houllé, P., *et al.*, 895

CALCITONIN GENE-RELATED PEPTIDE
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

CALCIUM
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744

CALCIUM CHANNELS
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

CALCIUM PHOSPHATES
Amorphous calcium phosphate: the contention of bone. Boskey, A.L., 1433
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682
Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587
Setting reaction and hardening of an apatitic calcium phosphate cement. Ginebra, M.P., *et al.*, 905
Solubility control of thin calcium-phosphate coating with rapid heating. Yoshinari, M., *et al.*, 1485

CALMODULIN
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744

CANADA
Oral hygiene habits of 11-year-old schoolchildren in 22 European countries and Canada in 1993/1994. Kuusela, S. *et al.*, 1602
Three-year changes in self-perceived oral health status in an older Canadian population. Locker, D. and Jokovic, A., 1292

CAPNOCYTOPHAGA
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

CAPSAICIN
Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341
Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory

masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848

CAPSAZEPINE
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848

CARBOXYLIC ACIDS
Short-chain carboxylic acid concentration in human gingival crevicular fluid. Niederman, R., *et al.*, 575

CARIOSTATIC AGENTS
Dr. Basil Bibby: early fluoride investigator and intellectual provocateur. Handelman, S. and Zero, D.T., 1621

CARTILAGE
Melvin L. Moss and the functional matrix. Moss-Salentijn, L., 1814

CASEINS
Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587

CATION CHANNELS (see Ion Channels)

CATS
Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341

CATTLE
Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

CD14 (see Antigens, CD14)

CD44 (see Antigens, CD44)

cDNA (see DNA, Complementary)

CELL MEMBRANE
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744

CEMENTS (see Dental Cements)

CEMENTUM
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

CHEEK
Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561

CHEWING (see Mastication)

CHILD
Longevity and cariostatic effects of everyday conventional glass-ionomer and amalgam restorations in primary teeth: three year results. Qvist, V., *et al.*, 1387
Oral hygiene habits of 11-year-old schoolchildren in 22 European countries and Canada in 1993/1994. Kuusela, S. *et al.*, 1602
Relationship between clinical tooth status and receipt of sealants among child Medicaid recipients, The. Robison, V.A., *et al.*, 1862

CHILD DEVELOPMENT
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579

CHILTON, NEAL W.
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239

CHITIN
Inhibition of *Streptococcus mutans* adsorption to hydroxyapatites by low-molecular-weight chitosans. Tarsi, R., *et al.*, 665

CHLORHEXIDINE
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

CHLORIDE CHANNELS
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

CHOLESTEROL
Salivary cholesterol of healthy adults in relation to serum cholesterol concentration and oral health. Karjalainen, S., *et al.*, 1637

CHONDROITIN SULFATES
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

CHROMATOGRAPHY, DEAE-CELLULOSE
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

CHROMATOGRAPHY, GEL
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

CHROMATOGRAPHY, HIGH-PRESSURE LIQUID
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

CINERADIOGRAPHY
Effect of food consistency upon jaw movement in the macaque: a cineradiographic study, The. Thexton, A. and Hiiemae, K.M., 552

CLINICAL RESEARCH (see Research)

CLINICAL TRIALS
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239
Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel,

H., *et al.*, 1787
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

CLODRONIC ACID
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529

CLONING, MOLECULAR
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720

COLLAGEN
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethylmethacrylate. Xu, J., *et al.*, 596

COLLAGENASES
Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529

COLONY-STIMULATING FACTORS
Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

COLUMBIA UNIVERSITY
Columbia, salivary research, plus Irwin Mandel equal a special combination for dentistry. Baum, B.J., *et al.*, 631

COMPOSITES
Comparative physico-mechanical characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883
In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405
Metal halide light source for laboratory curing of prosthetic composite materials, A. Matsumura, H., *et al.*, 688
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

CONDYLE, MANDIBULAR
(see Mandibular Condyle)

CONNEXIN 43
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

CONTRACTION
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495

COPPER
High-copper dental amalgam alloys, The. Mahler, D.B., 537
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787

CORROSION
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787

CRACKS (see Fractures)

CRANIOFACIAL BONES (see Facial Bones)

CRANIUM (see Skull)

CREVICULAR FLUID
(see Gingival Crevicular Fluid)

CRYSTALLIZATION
High resolution electron microscopy: structure and growth mechanisms of human dentin crystals. Houllé, P., *et al.*, 895
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682

CURING (see Light Curing)

CYSTEINE PROTEINASES
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260

CYTOKINES
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

CYTOPLASMIC GRANULES
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744

CYTOTOXICITY
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502

DECORIN
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

DEHYDRATION
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495

DEMINERALIZATION
(see Tooth Demineralization)

DENTAL ALLOYS
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869
High-copper dental amalgam alloys, The. Mahler, D.B., 537
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787

DENTAL AMALGAM
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869
Dissolution of mercury from dental amalgam at different pH values. Marek, M., 1308
Estimation of the size distribution of amalgam particles in dental treatment waste, An. Letzel, H. *et al.*, 780

Exposure to mercury vapor and impact on health in the dental profession in Sweden. Langworth, S., *et al.*, 1397
High-copper dental amalgam alloys, The. Mahler, D.B., 537
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787
Longevity and cariostatic effects of everyday conventional glass-ionomer and amalgam restorations in primary teeth: three year results. Qvist, V., *et al.*, 1387
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

DENTAL ANXIETY
Changes in self-reported dental anxiety in New Zealand adolescents from ages 15 to 18 years. Thomson, W.M., *et al.*, 1287

DENTAL BONDING
Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768
N-phenyliminodiacetic acid as an etchant/primer for dentin bonding. Schumacher, G.E., *et al.*, 602
Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

DENTAL CARIES
Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673
Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588
Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867
Guest editorial: general dental practice: this missing link in dental research. Mjör, I.A. and Wilson, N.H.F., 820
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Quantitative diagnosis of small approximal caries lesions utilizing wavelength-dependent fiber-optic transillumination. Vaarkamp, J., *et al.*, 875
Relationship between clinical tooth status and receipt of sealants among child Medicaid recipients, The. Robison, V.A., *et al.*, 1862
Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587
Streptococcus mutans safari, A! Bratthall, D., 1332
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

DENTAL CASTING TECHNIQUE
Effect of pressure difference on the quality of titanium casting. Watanabe, I., *et al.*, 773

DENTAL CAVITY PREPARATION
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854

DENTAL CEMENTS
Comparative physico-mechanical characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495
Longevity and cariostatic effects of everyday conventional glass-ionomer and amalgam restorations in primary teeth: three year results. Qvist, V., *et al.*, 1387
Setting reaction and hardening of an apatitic calcium phosphate cement. Ginebra, M.P., *et al.*, 905
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502

DENTAL CEMENTUM
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

DENTAL DEVICES, HOME CARE
Oral hygiene habits of 11-year-old schoolchildren in 22 European countries and Canada in 1993/1994. Kuusela, S. *et al.*, 1602

DENTAL ENAMEL
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Enamel subsurface damage due to tooth preparation with diamonds. Xu, H.H.K., *et al.*, 1698
In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405
Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648
Three-dimensional finite element model of prismatic enamel: a re-appraisal of the data on the Young's modulus of enamel, A. Spears, I.R., 1690

DENTAL ENAMEL PERMEABILITY
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

DENTAL EQUIPMENT
Enamel subsurface damage due to tooth preparation with diamonds. Xu, H.H.K., *et al.*, 1698

DENTAL FLOSS
(see Dental Devices, Home Care)

DENTAL FOLLICLE (see Dental Sac)

DENTAL IMPLANTATION, ENDOSSEOUS
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study. Lindquist, L.W., *et al.*, 1667
Effects of ionizing radiation on proliferation and differentiation of osteoblast-like cells. Dare, A., *et al.*, 658
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682

DENTAL IMPLANTS
Computer intuition: guiding scientific research in imaging and oral implantology. Almog, D.M. and Heisler, E.M., 1684
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529
Solubility control of thin calcium-phosphate coating with rapid heating. Yoshinari, M., *et al.*, 1485
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

DENTAL MATERIALS
Comparative physico-mechanical

characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883

DENTAL OCCLUSION

Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316

In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367

Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

DENTAL PAPILLA

Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831

Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

DENTAL PLAQUE

Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845

Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

Identification of *Bacteroides forsythus* in subgingival dental plaque with the aid of rapid PCR method. Meurman, J.H., *et al.*, 1376

Increased overnight fluoride concentrations in saliva, plaque, and plaque fluid after a novel two-solution rinse. Vogel, G.L., *et al.*, 761

Inhibition of *Streptococcus mutans* adsorption to hydroxyapatites by low-molecular-weight chitosans. Tarsi, R., *et al.*, 665

DENTAL PROPHYLAXIS

Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867

DENTAL PROSTHESIS, IMPLANT-SUPPORTED

Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

DENTAL PULP

Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341

Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561

Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555

Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

DENTAL PULP NECROSIS

IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548

DENTAL RESEARCH (see Research)

DENTAL RESTORATION, PERMANENT

Comparative physico-mechanical characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883

Longevity and cariostatic effects of everyday conventional glass-ionomer and amalgam restorations in primary teeth: three year results. Qvist, V., *et al.*, 1387

DENTAL RESTORATION WEAR

In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405

New optical 3-D device for the detection of wear, A. Mehl, A., *et al.*, 1799

Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

DENTAL SAC

Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

DENTAL SEALANTS (see Pit and Fissure Sealants)

DENTAL STAFF

Exposure to mercury vapor and impact on health in the dental profession in Sweden. Langworth, S., *et al.*, 1397

DENTAL STRESS ANALYSIS

Three-dimensional finite element model of prismatic enamel: a re-appraisal of the data on the Young's modulus of enamel, A. Spears, I.R., 1690

Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

DENTAL WASTE

Estimation of the size distribution of amalgam particles in dental treatment waste, An. Letzel, H. *et al.*, 780

DENTIN

Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754

FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethylmethacrylate. Xu, J., *et al.*, 596

High resolution electron microscopy: structure and growth mechanisms of human dentin crystals. Houllé, P., *et al.*, 895

DENTIN-BONDING AGENTS

FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethylmethacrylate. Xu, J., *et al.*, 596

Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768

N-phenyliminodiacetic acid as an etchant/primer for dentin bonding. Schumacher, G.E., *et al.*, 602

Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854

Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

DENTIN PERMEABILITY

Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

DENTINOGENESIS

Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754

Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

DENTISTRY

Guest editorial: general dental practice: this missing link in dental research. Mjör, I.A. and Wilson, N.H.F., 820

DENTURE, OVERLAY

Within-subject comparison of mandi-bular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A.

Tang, L., *et al.*, 1675

DERMATAN SULFATE
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

DEXTROMETHORPHAN
Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561

DIABETES MELLITUS
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825

DIAGNOSTIC IMAGING
Computer intuition: guiding scientific research in imaging and oral implantology. Almog, D.M. and Heisler, E.M., 1684

DIAMOND
Enamel subsurface damage due to tooth preparation with diamonds. Xu, H.H.K., *et al.*, 1698

DIPHOSPHONATES
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529

DMF INDEX
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

DNA, COMPLEMENTARY
Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754
Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648

DNA SEQUENCING
(see Sequence Analysis, DNA)

DOGS
Measurement of velopharyngeal movements induced by isolated stimulation of levator veli palatini and pharyngeal constrictor muscles. Adachi, T., *et al.*, 1745
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

DOPAMINE AGONISTS
Effects of the D2 receptor agonist bromocriptine on sleep bruxism: report of two single-patient clinical trials. Lobbezoo, F., *et al.*, 1610

DORSAL ROOT GANGLION
(see Ganglia, Spinal)

EDUCATION, DENTAL
Guest editorial: dental mythology and the Institute of Medicine report. Barnett, M.L., 1524
Mentoring: the gift of Barnet Levy. Robertson, P.B. and O'Neill, P.A., 1527
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

EDUCATION, DENTAL, GRADUATE
Guest editorial: the road less traveled--the decline in numbers of clinical researchers. Wise, G.E., 1428

ELASTICITY
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

ELDERLY (see Aged)

ELECTROMYOGRAPHY
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542
Evidence of sex-specific differences in masticatory jaw movement patterns. Gerstner, G.E. and Parekh, V.V., 796
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

ELECTROPHORESIS, AGAR GEL
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

ELECTROPHORESIS, POLYACRYLAMIDE GEL
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

ENAMEL (see Dental Enamel)

ENDOSSEOUS IMPLANTS
(see Dental Implantation, Endosseous)

ENTEROBACTERIACEAE
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

ENZYME-LINKED IMMUNOABSORBENT ASSAY
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

EPIDEMIOLOGY
Streptococcus mutans safari, A! Bratthall, D., 1332

ERYTHROCYTE SEDIMENTATION RATE
(see Blood Sedimentation Rate)

ESTROGENS
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471

ETCHING, DENTAL
(see Acid Etching, Dental)

EUGENOL
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848

EUROPE
Oral hygiene habits of 11-year-old schoolchildren in 22 European countries and

Canada in 1993/1994. Kuusela, S. *et al.*, 1602

EVALUATION STUDIES
Guest editorial: from chromatograph to cuspid: dental clinical research and the future of technology transfer. Barnett, M.L., 1812

EXOCYTOSIS
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744

EXONS
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641

EXPERIMENTAL DESIGN
(see Research Design)

EXTRACELLULAR MATRIX
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

FACIAL BONES
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579

FERTIG, JOHN W.
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239

FETAL GROWTH RETARDATION
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579

FIBER OPTICS
Quantitative diagnosis of small approximal caries lesions utilizing wavelength-dependent fiber-optic transillumination. Vaarkamp, J., *et al.*, 875

FIBROBLAST GROWTH FACTOR
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

FIBROBLASTS
Changes in the shape and orientation of periodontal ligament fibroblasts in the continuously erupting rat incisor following removal of the occlusal load. Weinreb, M., *et al.*, 1660

FILLERS
In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405

FILLING, DENTAL, PERMANENT
(see Dental Restoration, Permanent)

FIMBRIAE, BACTERIAL
Porphyromonas gingivalis fimbriae mediate coaggregation with *Streptococcus oralis* through specific domains. Amano, A., *et al.*, 852

FISSURE SEALANTS
(see Pit and Fissure Sealants)

FLEISS, JOSEPH L.
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239

FLUORIDES
Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845
Dr. Basil Bibby: early fluoride investigator and intellectual provocateur. Handelman, S. and Zero, D.T., 1621
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381
Increased overnight fluoride concentrations in saliva, plaque, and plaque fluid after a novel two-solution rinse. Vogel, G.L., *et al.*, 761
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502

FOLLISTATIN
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625

FOOD
Effect of food consistency upon jaw movement in the macaque: a cineradiographic study, The. Thexton, A. and Hiiemae, K.M., 552
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751

FRACTURES
Enamel subsurface damage due to tooth preparation with diamonds. Xu, H.H.K., *et al.*, 1698
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

GANGLIA, SPINAL
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

GAP JUNCTIONS
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

GEL FILTRATION
(see Chromatography, Gel)

GENDER (see Sex)

GENE EXPRESSION
Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641
Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

GENE LIBRARY
Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831

GENES, JUN
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

GENETICS
Genetic contribution to dental maturation, The. Pelsmaekers, B., *et al.*, 1337

GINGIVAL CREVICULAR FLUID
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529
Short-chain carboxylic acid concentration in human gingival crevicular fluid. Niederman, R., *et al.*, 575

GLASS-IONOMER CEMENTS
Comparative physico-mechanical characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495
Longevity and cariostatic effects of everyday conventional glass-ionomer and amalgam restorations in primary teeth: three-year results. Qvist, V., *et al.*, 1387
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502

GLUTAMIC ACID
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437

GLYCOSAMINOGLYCANS
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

GROWTH
Genetic contribution to dental maturation, The. Pelsmaekers, B., *et al.*, 1337
High resolution electron microscopy: structure and growth mechanisms of human dentin crystals. Houllé, P., *et al.*, 895

GROWTH SUBSTANCES
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

GUAIACOL
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848

H^+-TRANSPORTING ATP SYNTHASE
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580

HALITOSIS
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

HALOGENS
Metal halide light source for laboratory curing of prosthetic composite materials, A. Matsumura, H., *et al.*, 688

HARDNESS
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789

HEAD AND NECK NEOPLASMS
Parotid sparing study in head and neck cancer patients receiving bilateral radiation therapy: one-year results. Ship, J.A., *et al.*, 807

HEATING
Solubility control of thin calcium-phosphate coating with rapid heating. Yoshinari, M., *et al.*, 1485

HELICAL AXIS
Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704

HEMA
(see Hydroxyethylmethacrylate [HEMA])

HEPARITIN SULFATE
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

HEREDITY (see Genetics)

HISTATINS
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

HISTOCOMPATIBILITY ANTIGENS CLASS II
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

HISTORY OF DENTISTRY
Amorphous calcium phosphate: the contention of bone. Boskey, A.L., 1433
Columbia, salivary research, plus Irwin Mandel equal a special combination for dentistry. Baum, B.J., *et al.*, 631
Dr. Basil Bibby: early fluoride investigator and intellectual provocateur. Handelman, S. and Zero, D.T., 1621
Guest editorial: craniofacial-oral-dental research in the 21st century. Slavkin, H., 628
Guest editorial: molecular approaches to oral therapeutics: dentistry in the next millennium? Barnett, M.L., 1236
High-copper dental amalgam alloys, The. Mahler, D.B., 537
Melvin L. Moss and the functional matrix. Moss-Salentijn, L., 1814
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716
Streptococcus mutans safari, A! Bratthall, D., 1332
Three decades of pain research and its control. Dubner, R., 730

HIV INFECTIONS
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634
HIV status and the risk of post-extraction complications. Dodson, T.B., 1644

HLA-D ANTIGENS
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825

HUMAN IMMUNODEFICIENCY VIRUS INFECTIONS
(see HIV Infections)

HYALURON RECEPTORS
(see Antigens, CD44)

HYBRIDIZATION, *IN SITU*
(see *In Situ* Hybridization)

HYDROGEN ION CONCENTRATION
Dissolution of mercury from dental amalgam at different pH values. Marek, M., 1308
Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588

HYDROXYAPATITES
FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethylmethacrylate. Xu, J., *et al.*, 596
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682
Inhibition of *Streptococcus mutans* adsorption to hydroxyapatites by low-molecular-weight chitosans. Tarsi, R., *et al.*, 665
Setting reaction and hardening of an apatitic calcium phosphate cement. Ginebra, M.P., *et al.*, 905

HYDROXYETHYLMETHACRYLATE (HEMA)
FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethyl-methacrylate. Xu, J., *et al.*, 596

IADR/AADR
Abstracts, IADR/AADR, 14–452
Divisional abstracts, 916–1228
IADR in years to come. Glantz, P.-O., 1431
Investing in your future. Keller, J.C., 1517

IgG
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825

IMAGING TECHNIQUES
(see Diagnostic Imaging)

IMINO ACIDS
N-phenyliminodiacetic acid as an etchant/primer for dentin bonding. Schumacher, G.E., *et al.*, 602

IMMUNOBLOTTING
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

IMMUNOCOMPETENCE
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

IMMUNOCOMPROMISED HOST
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice.Fouad, A.F., 1548

IMMUNODIFFUSION
Prevalence and distribution of six capsular serotypes of *Porphyromonas gingivalis* in periodontitis patients. Laine, M.L., *et al.*, 1840

IMMUNOELECTROPHORESIS
Prevalence and distribution of six capsular serotypes of *Porphyromonas gingivalis* in periodontitis patients. Laine, M.L., *et al.*, 1840

IMMUNOGLOBULINS
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825

IMMUNOHISTOCHEMISTRY
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548
Localization of nerve cells in the developing rat tooth. Luukko, K., *et al.*, 1350

***IN SITU* HYBRIDIZATION**
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367

INCISOR
Changes in the shape and orientation of periodontal ligament fibroblasts in the continuously erupting rat incisor following removal of the occlusal load. Weinreb, M., *et al.*, 1660
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561

INDENTATION
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

INDIUM
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

INFANT, SMALL FOR GESTATIONAL AGE
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579

INFECTION
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271

INFLAMMATION
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

INFLAMMATION MEDIATORS
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

INSTITUTE OF MEDICINE
Guest editorial: dental mythology and the Institute of Medicine report. Barnett, M.L., 1524

INSULIN-LIKE GROWTH FACTOR I
Non-coordinate control of bone formation displayed by growth factor

combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

INTERLEUKINS
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetem-comitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

INTUITION
Computer intuition: guiding scientific research in imaging and oral implantology. Almog, D.M. and Heisler, E.M., 1684

ION CHANNELS
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

JAW
Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704
Effect of food consistency upon jaw movement in the macaque: a cineradiographic study, The. Thexton, A. and Hiiemae, K.M., 552
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542
Evidence of sex-specific differences in masticatory jaw movement patterns. Gerstner, G.E. and Parekh, V.V., 796
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Movements of the mandibular condyle kinematic center during jaw opening and closing. Yatabe, M., *et al.*, 714

JAW, EDENTULOUS
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

JAW RELATION RECORD
Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316

JOURNAL OF DENTAL RESEARCH
Editor's report, 1996. Herzberg, M., 532

KINEMATICS
Movements of the mandibular condyle kinematic center during jaw opening and closing. Yatabe, M., *et al.*, 714

KINETICS
Setting reaction and hardening of an apatitic calcium phosphate cement. Ginebra, M.P., *et al.*, 905

KLEBSIELLA
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

LEUKOCYTE COUNT
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271

LEUKOCYTE PROTEASE INHIBITORS, SECRETORY
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634

LEUKOCYTES
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

LEVY, BARNET
Mentoring: the gift of Barnet Levy. Robertson, P.B. and O'Neill, P.A., 1527

LIGHT CURING
Metal halide light source for laboratory curing of prosthetic composite materials, A.Matsumura, H., *et al.*, 688
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

LIPOPOLYSACCHARIDE RECEPTORS (see Antigens, CD14)

MACACA
Effect of food consistency upon jaw movement in the macaque: a cineradiographic study, The. Thexton, A. and Hiiemae, K.M., 552

MACROPHAGES
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538

MALOCCLUSION, ANGLE CLASS III
Morphometry of the cranial base in subjects with class III malocclusion. Singh, G.D., *et al.*, 694

MANDEL, IRWIN
Columbia, salivary research, plus Irwin Mandel equal a special combination for dentistry. Baum, B.J., *et al.*, 631

MANDIBLE
Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study. Lindquist, L.W., *et al.*, 1667
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

MANDIBULAR CONDYLE
Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704
Movements of the mandibular condyle

kinematic center during jaw opening and closing. Yatabe, M., *et al.*, 714
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

MARGINAL ADAPTATION (DENTISTRY)
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

MASSETER MUSCLE
Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

MASTICATION
Effect of food consistency upon jaw movement in the macaque: a cineradiographic study, The. Thexton, A. and Hiiemae, K.M., 552
Effects of food texture and sample thickness on mandibular movement and hardness assessment during biting in man. Peyron, M.A., *et al.*, 789
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542
Evidence of sex-specific differences in masticatory jaw movement patterns. Gerstner, G.E. and Parekh, V.V., 796
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

MASTICATORY FORCE
(see Bite Force)

MASTICATORY MUSCLES
Association among occlusal contacts, clenching effort, and bite force distribution in man, The. Kikuchi, M., *et al.*, 1316
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

MATRIX, EXTRACELLULAR
(see Extracellular Matrix)

MATRIX METALLOPROTEINASES (see Metalloproteinases)

MEDICAID
Relationship between clinical tooth status and receipt of sealants among child Medicaid recipients, The. Robison, V.A., *et al.*, 1862

MEMBRANE POTENTIALS
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

MEMBRANE (see Cell Membrane)

MENTORS
Mentoring: the gift of Barnet Levy. Robertson, P.B. and O'Neill, P.A., 1527

MERCURY
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869
Dissolution of mercury from dental amalgam at different pH values. Marek, M., 1308
Estimation of the size distribution of amalgam particles in dental treatment waste, An. Letzel, H. *et al.*, 780
Exposure to mercury vapor and impact on health in the dental profession in Sweden. Langworth, S., *et al.*, 1397
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

MESSENGER RNA
(see RNA, Messenger)

METALLOPROTEINASES
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529

METHACRYLOYLOXYDODECYLPYRIDINIUM BROMIDE (MDPB)
Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768

MICE
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548

MICROSCOPY, CONFOCAL
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495

MICROSCOPY, ELECTRON
High resolution electron microscopy: structure and growth mechanisms of human dentin crystals. Houllé, P., *et al.*, 895
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682
Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587
Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

MINERALIZATION
(see Calcification, Physiologic)

MODELS, THEORETICAL
Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704

MOLAR
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625

MOLECULAR BIOLOGY
Guest editorial: molecular approaches to oral therapeutics: dentistry in the next millennium? Barnett, M.L., 1236

MONOPEROXYPHTHALIC ACID
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

MORPHOMETRY
Morphometry of the cranial base in subjects with class III malocclusion. Singh, G.D., *et al.*, 694

MOSS, MELVIN L.
Melvin L. Moss and the functional matrix. Moss-Salentijn, L., 1814

MOTOR NEURONS
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839

MOUTH
Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

MOUTH MUCOSA
Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

MOUTH NEOPLASMS
Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

MOUTHWASHES
Increased overnight fluoride concentrations in saliva, plaque, and plaque fluid after a novel two-solution rinse. Vogel, G.L., *et al.*, 761
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

mRNA (see RNA, Messenger)

MUCINS
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

MUCOSA (see Oral Mucosa)

***N*-METHYLASPARTATE**
Differential effects of noxious conditioning stimulation of the cheek by capsaicin on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561

NATIONAL INSTITUTE OF DENTAL RESEARCH
Guest editorial: craniofacial-oral-dental research in the 21st century. Slavkin, H., 628

NERVE CELLS (see Neurons)

NERVE FIBERS
Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

NEURAL CONDUCTION
Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341

NEURONS
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Localization of nerve cells in the developing rat tooth. Luukko, K., *et al.*, 1350
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839

NEUROPEPTIDES
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

NEUROTRANSMITTERS
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

NEUTROPHILS
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529

NEW ZEALAND
Changes in self-reported dental anxiety in New Zealand adolescents from ages 15 to 18 years. Thomson, W.M., *et al.*, 1287

NIDR
(see National Institute of Dental Research)

NOCICEPTORS
Capsaicin-sensitive Aδ fibers in cat tooth pulp. Ikeda, H., *et al.*, 1341
Differential effects of noxious conditioning stimulation of the cheek by capsaicin

on human sensory and inhibitory masseter reflex responses evoked by tooth pulp stimulation. Kemppainen, P., *et al.*, 1561
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848
Three decades of pain research and its control. Dubner, R., 730

NOREPINEPHRINE
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

OCCUPATIONAL EXPOSURE
Exposure to mercury vapor and impact on health in the dental profession in Sweden. Langworth, S., *et al.*, 1397

ODONTOBLASTS
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

ODONTOGENESIS
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625

ODORS
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

OLIGOPEPTIDES
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

OPTICAL SCANNERS
New optical 3-D device for the detection of wear, A. Mehl, A., *et al.*, 1799

ORAL CAVITY (see Mouth)

ORAL HEALTH
Guest editorial: general dental practice: this missing link in dental research. Mjör, I.A. and Wilson, N.H.F., 820
Oral infections in home-living elderly patients admitted to an acute geriatric ward. Meurman, J.H., *et al.*, 1271
Salivary cholesterol of healthy adults in relation to serum cholesterol concentration and oral health. Karjalainen, S., *et al.*, 1637
Three-year changes in self-perceived oral health status in an older Canadian population. Locker, D. and Jokovic, A., 1292

ORAL HYGIENE
Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study. Lindquist, L.W., *et al.*, 1667
Oral hygiene habits of 11-year-old school-children in 22 European countries and Canada in 1993/1994. Kuusela, S. *et al.*, 1602

ORAL MUCOSA
Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

ORAL NEOPLASMS
Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

ORTHODONTICS, CORRECTIVE
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

OSSEOINTEGRATION
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study Lindquist, L.W., *et al.*, 1667
Effects of ionizing radiation on proliferation and differentiation of osteoblast-like cells. Dare, A., *et al.*, 658
HRTEM study of biological crystal growth mechanisms in the vicinity of implanted synthetic hydroxyapatite crystals. Hemmerlé, J., *et al.*, 682

OSTEOBLASTS
Effects of ionizing radiation on proliferation and differentiation of osteoblast-like cells. Dare, A., *et al.*, 658
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

OSTEOCLASTS
Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580

OSTEOGENESIS
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

OSTEOPOROSIS
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471

OVARIECTOMY
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471

OVERDENTURES
(see Denture, Overlay)

OXIDANTS
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

OXIDATION
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

PAIN
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Selective capsaicin antagonist capsazepine abolishes the antinociceptive action of eugenol and guaiacol, The. Ohkubo, T. and Shibata, M., 848
Three decades of pain research and its

control. Dubner, R., 730

PAIN RECEPTORS (see Nociceptors)

PALATAL MUSCLES
Measurement of velopharyngeal movements induced by isolated stimulation of levator veli palatini and pharyngeal constrictor muscles. Adachi, T., *et al.*, 1745

PALATE, SOFT
Measurement of velopharyngeal movements induced by isolated stimulation of levator veli palatini and pharyngeal constrictor muscles. Adachi, T., *et al.*, 1745

PAPILLAE, DENTAL
(see Dental Papilla)

PARATHYROID HORMONE
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471

PAROTID GLAND
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744
Parotid sparing study in head and neck cancer patients receiving bilateral radiation therapy: one-year results. Ship, J.A., *et al.*, 807

PATCH-CLAMP TECHNIQUES
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

PATIENT SATISFACTION
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

PCR (see Polymerase Chain Reaction)

PCR, RNA-DIRECTED
(see RNA-Directed DNA Polymerase)

PEPTIDE HYDROLASES
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

PEPTIDES
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

PERI-IMPLANTITIS
(see Inflammation)

PERIAPICAL DISEASES
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548

PERIODONTAL DISEASES
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381
Identification of *Bacteroides forsythus* in subgingival dental plaque with the aid of rapid PCR method. Meurman, J.H., *et al.*, 1376
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367
Short-chain carboxylic acid concentration in human gingival crevicular fluid. Niederman, R., *et al.*, 575

PERIODONTAL INDEX
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

PERIODONTAL LIGAMENT
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
Changes in the shape and orientation of periodontal ligament fibroblasts in the continuously erupting rat incisor following removal of the occlusal load. Weinreb, M., *et al.*, 1660
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367

PERIODONTAL POCKETS
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

PERIODONTITIS
Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858
HLA-D types and serum IgG responses to *Capnocytophaga* in diabetes and periodontitis. Dyer, J.K., *et al.*, 1825
Human neutrophil collagenase MMP-8 in peri-implant sulcus fluid and its inhibition by clodronate. Teronen, O. *et al.*, 1529
Prevalence and distribution of six capsular serotypes of *Porphyromonas gingivalis* in periodontitis patients. Laine, M.L., *et al.*, 1840
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

PERIODONTIUM
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

PERIODONTOLOGY
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

PERIPHERIN
Localization of nerve cells in the developing rat tooth. Luukko, K., *et al.*, 1350

PERMEABILITY
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

pH (see Hydrogen-Ion Concentration)

PHAGOCYTES
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

PHARYNGEAL MUSCLES
Measurement of velopharyngeal movements induced by isolated stimulation of levator veli palatini and pharyngeal constrictor muscles. Adachi, T., *et al.*, 1745

N-PHENYLIMINODIACETIC ACIDS
N-phenyliminodiacetic acid as an etchant/primer for dentin bonding. Schumacher, G.E., *et al.*, 602

PHOSPHATES
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

PHOSPHOLIPASE A
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

PHOSPHOPROTEINS
Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754

PHOTORADIATION (see Light)

PHYTIC ACID
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

PIGS (see Swine)

PIT AND FISSURE SEALANTS
Relationship between clinical tooth status and receipt of sealants among child Medicaid recipients, The. Robison, V.A., *et al.*, 1862

PLASMA MEMBRANE
(see Cell Membrane)

PLATELET ACTIVATING FACTOR
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

PLATELET-DERIVED GROWTH FACTOR
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

POLARIZATION CURVES
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869

POLYMERASE CHAIN REACTION
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641
Identification of *Bacteroides forsythus* in subgingival dental plaque with the aid of rapid PCR method. Meurman, J.H., *et al.*, 1376
Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

POLYMERASE CHAIN REACTION, RNA-DIRECTED
(see RNA-Directed DNA Polymerase)

POLYMORPHONUCLEAR LEUKOCYTES
(see Neutrophils)

POLYPEPTIDES (see Peptides)

POROSITY
Effect of pressure difference on the quality of titanium casting. Watanabe, I., *et al.*, 773

PORPHYROMONAS GINGIVALIS
Activation and novel processing of matrix metalloproteinases by a thiol-proteinase from the oral anaerobe *Porphyromonas gingivalis*. DeCarlo, A.A., Jr., *et al.*, 1260
Porphyromonas gingivalis fimbriae mediate coaggregation with *Streptococcus oralis* through specific domains. Amano, A., *et al.*, 852
Prevalence and distribution of six capsular serotypes of *Porphyromonas gingivalis* in periodontitis patients. Laine, M.L., *et al.*, 1840

POSNER, AARON
Amorphous calcium phosphate: the contention of bone. Boskey, A.L., 1433

POSTOPERATIVE COMPLICATIONS
HIV status and the risk of post-extraction complications. Dodson, T.B., 1644

PRESSURE
Effect of pressure difference on the quality of titanium casting.Watanabe, I., *et al.*, 773

PROBING OF PERIODONTAL POCKETS
(see PERIODONTITIS)

PROLINE
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

PROPIONIC ACIDS
Short-chain carboxylic acid concentration in human gingival crevicular fluid. Niederman, R., *et al.*, 575

PROTEASE INHIBITORS
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634

PROTEGRINS
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453

PROTEINS
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538

PROTEOGLYCANS
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

PROTEOLYTIC ENZYMES
(see Peptide Hydrolases)

PROTIRELIN
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437

PROTO-ONCOGENES
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

PSYCHOMETRICS
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: psychometric evaluation and patient preference, A. Tang, L., *et al.*, 1675

PUTRESCINE
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

RADIATION, IONIZING
Effects of ionizing radiation on proliferation and differentiation of osteoblast-like cells. Dare, A., *et al.*, 658

RADIATION PROTECTION
Parotid sparing study in head and neck cancer patients receiving bilateral radiation therapy: one-year results. Ship, J.A., *et al.*, 807

RADIOGRAPHY, DENTAL
Oral infections in home-living elderly patients admitted to an acute geriatric

ward. Meurman, J.H., *et al.*, 1271

RADIOTHERAPY
Parotid sparing study in head and neck cancer patients receiving bilateral radiation therapy: one-year results. Ship, J.A., *et al.*, 807

RAMAN SPECTROSCOPY
(See Spectrum Analysis, Raman)

RAMFJORD, SIGURD P.
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

RANDOMIZED CONTROLLED TRIALS
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

RATS
Changes in the shape and orientation of periodontal ligament fibroblasts in the continuously erupting rat incisor following removal of the occlusal load. Weinreb, M., *et al.*, 1660
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737
Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357
Intermittent parathyroid hormone administration stimulates bone formation in the mandibles of aged ovariectomized rats. Miller, S.C., *et al.*, 1471
Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244
Localization of nerve cells in the developing rat tooth. Luukko, K., *et al.*, 1350
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

RECEPTORS, COLONY-STIMULATING FACTOR
Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

RECEPTORS, DOPAMINE D2
Effects of the D2 receptor agonist bromocriptine on sleep bruxism: report of two single-patient clinical trials. Lobbezoo, F., *et al.*, 1610

RECEPTORS, TRANSFORMING GROWTH FACTOR BETA
Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555

REFLEX, STRETCH
Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839

REGENERATION
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

REMINERALIZATION
(see Tooth Remineralization)

REPRODUCIBILITY OF RESULTS
Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

RESEARCH
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239
Columbia, salivary research, plus Irwin Mandel equal a special combination for dentistry. Baum, B.J., *et al.*, 631
Computer intuition: guiding scientific research in imaging and oral implantology. Almog, D.M. and Heisler, E.M., 1684
Guest editorial: craniofacial-oral-dental research in the 21st century. Slavkin, H., 628
Guest editorial: from chromatograph to cuspid: dental clinical research and the future of technology transfer. Barnett, M.L., 1812
Guest editorial: general dental practice: this missing link in dental research. Mjör, I.A. and Wilson, N.H.F., 820
Guest editorial: is it time for a new approach to authorship? Leash, E., 724
Guest editorial: molecular approaches to oral therapeutics: dentistry in the next millennium? Barnett, M.L., 1236
Guest editorial: the road less traveled--the decline in numbers of clinical researchers. Wise, G.E., 1428
Three decades of pain research and its control. Dubner, R., 730

RESEARCH DESIGN
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239

RESIN COMPOSITES
(see Composites)

RESINS
Comparative physico-mechanical characterization of new hybrid restorative materials with conventional glass-ionomer and resin composite restorative materials. Gladys, S., *et al.*, 883
Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495
Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768
Variability in cytotoxicity and fluoride release of resin-modified glass-ionomer cements. Kan, K.C., *et al.*, 1502
Wear and marginal breakdown of composites with various degrees of cure. Ferracane, J.L., *et al.*, 1508

RNA, MESSENGER
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641
Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

RNA-DIRECTED DNA POLYMERASE
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

RNA SPLICING
Cloning, characterization, and heterologous expression of exon-4-containing amelogenin mRNAs. Hu, C.-C., *et al.*, 641

ROOT CARIES
Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845
Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854

ROOT (see Tooth Root)

RT-PCR
(see RNA-Directed DNA Polymerase)

SALICYLIC ACIDS
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381

SALIVA
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634
Columbia, salivary research, plus Irwin Mandel equal a special combination for dentistry. Baum, B.J., *et al.*, 631
Increased overnight fluoride concentrations in saliva, plaque, and plaque fluid after a novel two-solution rinse. Vogel, G.L., *et al.*, 761
Novel system of human submandibular/sublingual saliva collection, A. Wolff, A., *et al.*, 1782
Salivary cholesterol of healthy adults in relation to serum cholesterol concentration and oral health. Karjalainen, S., *et al.*, 1637

SALIVARY GLANDS
Effects of calcium and calmodulin on the binding of rat parotid secretion granules to the plasma membrane. Watkins, D.T. and Cooperstein, S.J., 744
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734
Novel system of human submandibular/sublingual saliva collection, A. Wolff, A., *et al.*, 1782
Parotid sparing study in head and neck cancer patients receiving bilateral radiation therapy: one-year results. Ship, J.A., *et al.*, 807
Stimulation of platelet-activating factor synthesis by neurotransmitters in salivary glands. Dohi, T., *et al.*, 568

SALIVARY PROTEINS
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

SEALANTS
(see Pit and Fissure Sealants)

SECRETORY GRANULES
(see Cytoplasmic Granules)

SEQUENCE ANALYSIS
Identification, partial characterization, and distribution of versican and link protein in bovine dental pulp. Yamauchi, S., *et al.*, 1730

SEQUENCE ANALYSIS, DNA
Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Cloning and expression analysis of the bovine dentin matrix acidic phosphoprotein gene. Hirst, K.L., *et al.*, 754
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648

SERINE PROTEASE INHIBITORS
Anti-HIV-1 activity associated with saliva, The. Shine, N., *et al.*, 634

SEVERE COMBINED IMMUNODEFICIENCY
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548

SEX
Evidence of sex-specific differences in masticatory jaw movement patterns. Gerstner, G.E. and Parekh, V.V., 796

SHEAR BOND STRENGTH
Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

SHEATH PROTEINS
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648

SHRINKAGE (see Contraction)

SILICON DIOXIDE
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

SILVER
Connections between polarization curves and $\log(a_i/a_{ref})$-pe diagram. Olsson, S., *et al.*, 1869
High-copper dental amalgam alloys, The. Mahler, D.B., 537

SKULL
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437
Craniofacial growth in short children born small for gestational age: effect of growth hormone treatment. Van Erum, R., *et al.*, 1579
Melvin L. Moss and the functional matrix. Moss-Salentijn, L., 1814

SKULL BASE
Morphometry of the cranial base in subjects with class III malocclusion. Singh, G.D., *et al.*, 694

SLEEP
Effects of the D2 receptor agonist bromocriptine on sleep bruxism: report of two single-patient clinical trials. Lobbezoo, F., *et al.*, 1610

SMOKING
Association between marginal bone loss around osseointegrated mandibular implants and smoking habits: a 10-year follow-up study. Lindquist, L.W., *et al.*, 1667
Smoking, smoking cessation, and tooth loss. Krall, E.A., *et al.*, 1653

SOCIETIES, DENTAL
(see IADR/AADR)

SODIUM FLUORIDE
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

SOLUBILITY
Solubility control of thin calcium-phosphate coating with rapid heating. Yoshinari, M., *et al.*, 1485

SPECTROPHOTOMETRY, ATOMIC ABSORPTION
Dissolution of mercury from dental

amalgam at different pH values. Marek, M., 1308

SPECTRUM ANALYSIS
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

SPECTRUM ANALYSIS, RAMAN
FT-Raman spectroscopic investigation of dentin and collagen surfaces modified by 2-hydroxyethylmethacrylate. Xu, J., *et al.*, 596

STAINS AND STAINING
Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

STANNOUS FLUORIDES
(see Tin Fluorides)

STATHERINS
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734

STATISTICS
Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239
Tyranny of the p-value: the conflict between statistical significance and common sense. Barnett, M.L. and Mathisen, A., 534

STRAIN (see Stress, Mechanical)

STRENGTH (see Tensile Strength)

STREPTOCOCCUS MUTANS
Incorporation of antibacterial monomer MDPB into dentin primer. Imazato, S., *et al.*, 768
Inhibition of *Streptococcus mutans* adsorption to hydroxyapatites by low-molecular-weight chitosans. Tarsi, R., *et al.*, 665
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477
Prevalence and depth of artificial caries-like lesions adjacent to cavities prepared in roots and restored with a glass ionomer or dentin-bonded composite material. Gilmour, A.S.M., *et al.*, 1854
Streptococcus mutans safari, A! Bratthall, D., 1332

STREPTOCOCCUS ORALIS
Porphyromonas gingivalis fimbriae mediate coaggregation with *Streptococcus oralis* through specific domains. Amano, A., *et al.*, 852

STREPTOCOCCUS SANGUIS
Pathway for uptake and degradation of X-prolyl tripeptides in *Streptococcus mutans* VA-29R and *Streptococcus sanguis* ATCC 10556. Cowman, R.A. and Baron, S.S., 1477

STRESS, MECHANICAL
In vitro cellular aging stimulates interleukin-1β production in stretched human periodontal-ligament-derived cells. Shimizu, N., *et al.*, 1367
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412
Three-dimensional finite element model of prismatic enamel: a re-appraisal of the data on the Young's modulus of enamel, A. Spears, I.R., 1690
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760
Why do shear bond tests pull out dentin? Versluis, A., *et al.*, 1298

STRESS ANALYSIS, DENTAL
(see Dental Stress Analysis)

SUBLINGUAL GLAND
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734
Novel system of human submandibular/sublingual saliva collection, A. Wolff, A., *et al.*, 1782

SUBMANDIBULAR GLAND
Human salivary mucin MG1 selectively forms heterotypic complexes with amylase, proline-rich proteins, statherin, and histatins. Iontcheva, I., *et al.*, 734
Novel system of human submandibular/sublingual saliva collection, A. Wolff, A., *et al.*, 1782

SUBSTANCE P
Structural and functional association between substance P- and calcitonin gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

SULFIDES
Isolation of *Enterobacteriaceae* from the mouth and potential association with malodor. Goldberg, S., *et al.*, 1770

SUPEROXIDES
Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381

SURFACE PROPERTIES
Surface characterization of amalgam made with Hg-In liquid alloy. Nakajima, H., *et al.*, 610

SURROGATE MARKERS
(see Biological Markers)

SURVIVAL ANALYSIS
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787

SWEDEN
Exposure to mercury vapor and impact on health in the dental profession in Sweden. Langworth, S., *et al.*, 1397

SWINE
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412
Sensitivity of periodontal pathogens to the bactericidal activity of synthetic protegrins, antibiotic peptides derived from porcine leukocytes. Miyasaki, K.T., *et al.*, 1453
Sheathlin: cloning, cDNA/polypeptide sequences, and immunolocalization of porcine enamel sheath proteins. Hu, C.-C., *et al.*, 648
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

SYNDECAN-1
Expression of heparan sulphate and small dermatan/chondroitin sulphate proteoglycans in chronically inflamed human periodontium. Oksala, O., *et al.*, 1250

T LYMPHOCYTES
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice Fouad, A.F., 1548
Structural and functional association between substance P- and calcitonin

gene-related peptide-immunoreactive nerves and accessory cells in the rat dental pulp. Okiji, T., *et al.*, 1818

TASK FORCE ON DESIGN AND ANALYSIS IN DENTAL AND ORAL RESEARCH

Chilton, Fertig, Fleiss, and the Task Force on Design and Analysis in Dental and Oral Research. Kingman, A., *et al.*, 1239

TASTE BUDS

Analysis and comparison of partial sequences of clones from a taste-bud-enriched cDNA library. Hoon, M.A. and Ryba, N.J.P., 831

TECHNOLOGY TRANSFER

Guest editorial: from chromatograph to cuspid: dental clinical research and the future of technology transfer. Barnett, M.L., 1812

TECHNOLOGY TRANSFER
(see Research)

TEMPORAL MUSCLE

Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561

Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542

Modulation of the mandibular stretch reflex sensitivity during various phases of rhythmic open-close movements in humans. van der Bilt, A., *et al.*, 839

Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

TEMPOROMANDIBULAR JOINT

Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437

Description of mandibular finite helical axis pathways in asymptomatic subjects. Gallo, L.M., *et al.*, 704

Movements of the mandibular condyle kinematic center during jaw opening and closing. Yatabe, M., *et al.*, 714

Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 1412

TEMPOROMANDIBULAR JOINT DISK

Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

TENSILE STRENGTH

Effect of pressure difference on the quality of titanium casting. Watanabe, I., *et al.*, 773

THIOL PROTEINASES
(see Cysteine Proteinases)

THYROTROPIN-RELEASING HORMONE
(see Protirelin)

TIME FACTORS

Effects of maturity and dehydration shrinkage on resin-modified glass-ionomer restoration, The. Sidhu, S.K., *et al.*, 1495

TIN FLUORIDES

Effect of amine- and stannous fluoride on human neutrophil functions *in vitro*. Shapira, L., *et al.*, 1381

TITANIUM

Effect of pressure difference on the quality of titanium casting. Watanabe, I., *et al.*, 773

Solubility control of thin calcium-phosphate coating with rapid heating. Yoshinari, M., *et al.*, 1485

TOBACCO, SMOKELESS

Oral mucosal smokeless tobacco lesions among adolescents in the United States. Tomar, S.L., *et al.*, 1277

TOOTH

Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555

Impact velocities of the teeth after a sudden unloading at various initial bite forces, degrees of mouth opening, and distances of travel. Nagashima, T., *et al.*, 1751

Reduced chlorhexidine tooth stain coverage by sequential administration of monoperoxyphthalic acid in the beagle dog. Charbonneau, D.L. and Snider, A.G., 1596

TOOTH ABRASION

In vitro wear of composite with varied cure, filler level, and filler treatment. Condon, J.R. and Ferracane, J.L., 1405

TOOTH DEMINERALIZATION

Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845

Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588

TOOTH ERUPTION

Changes in the shape and orientation of periodontal ligament fibroblasts in the continuously erupting rat incisor following removal of the occlusal load. Weinreb, M., *et al.*, 1660

Genetic contribution to dental maturation, The. Pelsmaekers, B., *et al.*, 1337

Localization and expression of CSF-1 receptor in rat dental follicle cells. Wise, G.E., *et al.*, 1244

TOOTH EXTRACTION

HIV status and the risk of post-extraction complications. Dodson, T.B., 1644

TOOTH GERM

Expression of c-jun and jun-B proto-oncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

Localization of nerve cells in the developing rat tooth. Luukko, K., *et al.*, 1350

TOOTH LOSS

Effects of simple interventions on tooth mortality: findings in one trial and implications for future studies, The. Hujoel, P.P., *et al.*, 867

Evaluating the validity of probing attachment loss as a surrogate for tooth mortality in a clinical trial on the elderly, Hujoel, P.P., *et al.*, 858

Smoking, smoking cessation, and tooth loss. Krall, E.A., *et al.*, 1653

TOOTH MOVEMENT

Distributional changes of osteoclasts and pre-osteoclastic cells in periodontal tissues during experimental tooth movement as revealed by quantitative immunohistochemistry of H^+-ATPase. Yokoya, K., *et al.*, 580

Expression of connexin 43 in rat mandibular bone and periodontal ligament (PDL) cells during experimental tooth movement. Su, M., *et al.*, 1357

TOOTH PREPARATION

Enamel subsurface damage due to tooth preparation with diamonds. Xu, H.H.K., *et al.*, 1698

TOOTH REMINERALIZATION

Arrest of root surface caries *in situ*. Nyvad, B., *et al.*, 1845

Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds, E.C., 1587

TOOTH ROOT
Effects of collagenase on root demineralization. Kawasaki, K. and Featherstone, J.D.B., 588

TOOTH ROOT CARIES
(see Root Caries)

TOOTH SUPPORTING STRUCTURES
(see Periodontium)

TOOTHBRUSHING
Oral hygiene habits of 11-year-old schoolchildren in 22 European countries and Canada in 1993/1994. Kuusela, S. *et al.*, 1602

TOOTHPASTE
Three-year clinical trial of a combination of trimetaphosphate and sodium fluoride in silica toothpastes, A. O'Mullane, D.M., *et al.*, 1776

TRANSCRIPTION, GENETIC
Expression of c-jun and jun-B protooncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822

TRANSDUCERS
Effect of jaw opening on the direction and magnitude of human incisal bite forces. Paphangkorakit, J. and Osborn, J.W., 561

TRANSFORMING GROWTH FACTOR BETA
Activin-binding protein follistatin is expressed in developing murine molar and induces odontoblast-like cell differentiation *in vitro*, The. Heikinheimo, K., *et al.*, 1625
Expression of c-jun and jun-B protooncogenes in odontoblasts during development of bovine tooth germs. Kitamura, C. and Terashita, M., 822
Expression of TGF-β superfamily receptors in dental pulp. Toyono, T. *et al.*, 1555
Non-coordinate control of bone formation displayed by growth factor combinations with IGF-I. Giannobile, W.V., *et al.*, 1569

TRANSILLUMINATION
Quantitative diagnosis of small approximal caries lesions utilizing wavelength-dependent fiber-optic transillumination. Vaarkamp, J., *et al.*, 875

TRIGEMINAL NERVE
Craniofacial and TMJ effects after glutamate and TRH microsphere implantation in proximity to trigeminal motorneurons of growing rats. Byrd, K.E., *et al.*, 1437

TRIMETAPHOSPHATE
(see Phosphates)

TUFTELIN
Cloning and characterization of porcine enamelin mRNAs. Hu, C.-C., *et al.*, 1720

TUMOR NECROSIS FACTOR ALPHA
Extracellular 37-kDa antigenic protein from *Actinobacillus actinomycetemcomitans* induces TNF-α, IL-1β, and IL-6 in murine macrophages. Tani, Y. *et al.*, 1538
IL-1α and TNF-α expression in early periapical lesions of normal and immunodeficient mice. Fouad, A.F., 1548
Profile of cytokine mRNA expression in chronic adult periodontitis. Roberts, F.A., *et al.*, 1833

TWINS
Genetic contribution to dental maturation, The. Pelsmaekers, B., *et al.*, 1337

UNIVERSITY OF MICHIGAN
Sigurd Ramfjord and Major Ash, Jr.: periodontology and occlusion at Michigan. Pihlstrom, B.L., 1716

VALIDITY OF RESULTS
(see Reproducibility of Results)

VELOPHARYNX (see Palate, Soft)

VERSICAN (see Proteoglycans)

VISCOSITY
Viscoelastic properties of the pig temporomandibular joint articular soft tissues of the condyle and disc. Kuboki, T., *et al.*, 1760

VISUAL FEEDBACK
Electromyographic heterogeneity in the human temporalis and masseter muscles during dynamic tasks guided by visual feedback. Blanksma, N.G., *et al.*, 542

VOLTAGE-CLAMP TECHNIQUES
Eugenol activates Ca^{2+}-permeable currents in rat dorsal root ganglion cells. Ohkubo, T. and Kitamura, K., 1737

WEAR RESISTANCE
(see Abrasion Resistance)

WEAR (see Tooth Abrasion)

WASTE PRODUCTS
Estimation of the size distribution of amalgam particles in dental treatment waste, An. Letzel, H. *et al.*, 780

WOUND HEALING
Recombinant human bone morphogenetic protein-2 promotes wound healing in rat periodontal fenestration defects. King, G.N., *et al.*, 1460

YOUNG'S MODULUS
Three-dimensional finite element model of prismatic enamel: a re-appraisal of the data on the Young's modulus of enamel, A. Spears, I.R., 1690

ZINC
Influence of the amalgam alloy on the survival of amalgam restorations: a secondary analysis of multiple controlled clinical trials, The. Letzel, H., *et al.*, 1787

ZONYL-FSC
Changes in the permselectivity of human teeth during caries attack. Vogel, G.L., *et al.*, 673

The indices were prepared by Fetters InfoManagement, Corpus Christi, TX.
